Advice

We regularly get asked “I had a spill, what should I have done”?

Wine, Tea, Coffee, Juice, Squash

Gently soak up as much of the liquid as you can with paper towels or a clean cloth by using the light pressure of your hand. Take your time.

Then gently pour on some cold water, and again with paper towels or a clean cloth apply pressure until you have soaked as much of the liquid up as you can.

Call us, the sooner you can have the stain removed by hot water / steam extraction the better the results.

Blood

Gently dab the excess, add a little water but you are better to give us a call

Ink, Nail Varnish

Call us – do not rub or add water (it will only spread it)

Grease, Oil, Tar

Scrap up any excess, do not rub or add water – Call us

Chewing Gum

Do not rub, leave it to dry. You will then be able to break it up to remove it.

Please avoid using supermarket quick fix products. These often leave a lighted patch on your carpet and makes it more difficult for us to remove the remaining stain !!

Quality Carpet Care

. Live Cleaner . Live Healthier .

OUR PROCESS

Discuss with you your requirements & assess the job

Vacuum – this helps lift the pile & remove excess soiling

Apply a pre soak shampoo

Treat Stains

Deodorize

Hot Water / Steam Extraction

THE RESULTS

Extended life of your Carpet

Sanitized & Deodorized

Reduced Allergies

Peace of Mind

Why use a professional company when I can hire a machine & do it myself?

Doing it yourself may be a cheaper option, but these machines do not have the power to remove the water from the carpet & will leave your carpets wet. The product range is very limited for treating different stains.
